

Good afternoon-

I am writing to express my dismay and disappointment about the maps submitted by Representative Cupp. The intent and spirit of the commission was to create maps that are fair and represent the make up of the state. These maps fail to do this. Furthermore, my own city, Solon is divided in half across two districts and this is unacceptable.

Do better. 71% of voters supported the commission and the stated intention of transparency, fairness, and representation. This will be your legacy and moving forward with a partisan plan that does not serve the people of Ohio is not okay. Why are you choosing to serve on this commission if you don't believe in it? Releasing a map that was late and that is rushed, and scheduling these meetings at the last minute on a business day is not reasonable or acceptable.
